By Whom? BLM Natural Resource Specialist made initial release notification.	Date and Hour May 26, 2016 (hour unknown)	
Was a Watercourse Reached? <input type="checkbox"/> Yes X No	If YES, Volume Impacting the Watercourse. n/a	

If a Watercourse was Impacted, Describe Fully.*
The release did not impact a watercourse.

Describe Cause of Problem and Remedial Action Taken.* The release was caused by a hole in a flowline that was discovered by the BLM's Natural Resource Specialist ("Specialist") on Thursday, May 26, 2016. The Specialist notified J. Cleo Thompson ("J. Cleo") of the release. The release source was remedied resulting in a minimal impact footprint due to low release volumes. On May 27, 2016, the BLM and J. Cleo performed a joint release evaluation at the site. Sport Environmental Services, LLC (environmental consultant) performed initial remedial efforts at the release site on Monday, May 30, 2016. Based upon visual assessment, *Micro-Blaze* was applied to the hydrocarbon impacted-areas at the site where residual impact was present (no free liquids). Attached please find a site plan denoting area impacted and *Micro-Blaze* application quantities. The BLM would like to perform an archeology study in the immediate release area prior to any further remedial efforts and potential soils disturbance by J. Cleo Thompson.

Describe Area Affected and Cleanup Action Taken.* The affected area is remote in location. The flowline was moving well fluids from three wells to a satellite battery to be ultimately transferred to the consolidated battery location. A hole in flowline resulting in an estimated well fluids loss of 5-10 bbl. Product was adsorbed into surficial soils resulting in non-recovery of released fluids. Impacted area is roughly 1,704 square feet. *Micro-Blaze* treatment was applied on 575 square feet (34%) of the affected area. See the section above for a complete description of remedial and cleanup actions taken to date. See attached site plan (demarcated aerial imagery) for release specifics.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
