Describe Cause of Problem and Remedial Action Taken.*

25BBLS of oil was released. The release originated on the manway gasket on the horizontal separator due to wear and tear. The valve was shut off to prevent further release and isolate the leak. A new gasket was installed.

Describe Area Affected and Cleanup Action Taken.*

25BBLS of oil was released from the horizontal separator. The release flowed in a northeastern direction. The fluid sprayed vegetation on the northeast side of pad. 15BBLS of oil was recovered via vacuum truck. The approximate size of the total affected area including vegetation spray was 100ft by 100ft on the Northeast of location. An environmental company will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
