Describe Cause of Problem and Remedial Action Taken.*

Corrosion occurred in the water discharge pump line resulting in a release of 10 BBLS produced water. The well and water injection pump was shut down immediately to prevent further release. Repairs to discharge pump line are in progress.

Describe Area Affected and Cleanup Action Taken.*

10 BBLS of produced water was released from a corroded discharge pump line that runs from the produced water tanks. All 10 BBLS of produced water released remained in concrete containment. None of the released fluid left location. Vacuum truck recovered all 10 BBLS of the released produced water. No further action is necessary.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
