If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The tank that was being produced into developed a leak out of the hatch. Production was switched to a different tank and the hatches were opened on the leaking tank to release pressure. Vacuum trucks were called to recover crude oil.

Describe Area Affected and Cleanup Action Taken.*

The release impacted the area inside of the lined berm. Oil was recovered from within the berm and the gravel is being removed and replaced. Depth to Ground Water: 50-99' (approximately 70', per Chevron/Texaco Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 10. Based on recovery of all crude oil and the battery being bermed/lined, Yates Petroleum requests closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
