If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* A sight glass broke on the production vessel releasing 20 barrels of oil to the lined containment. A vacuum truck was called to the location and was able to recover the majority of the fluid (very small amount remains due to production equipment). A very light mist covered a small area of caliche, this area has been scraped up and disposed of properly.		
Describe Area Affected and Cleanup Action Taken.* A vacuum truck was called to the location and recovered the fluid from inside the lined containment. A backhoe was utilized to scrape up the lightly misted caliche area.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
