Was a Watercourse Reached? If YES, Volume Impacting the Watercourse		Vatercourse
Yes No N/A		, attribute
If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* The flowline from the Shakespeare 20 Fed Com 3H developed a hole possibly from a gunshot. The flow line was isolated and a new clamp was installed to prevent further release. Repairs were made.		
Describe Area Affected and Cleanup Action Taken.* Approximately 10BBLS of produced water and .5BBLS oil was released from the flowline onto the lease road. The release originated on the North side of the pasture and flowed onto the lease road in a southwestern direction, The hole in the flow line also produced a spray mist that affected approximately a 40ft by 40ft area. The approximate size of the flow was 6ft by 100ft from the pasture to the lease road5BBLS produced water and 0BBLS oil were recovered via vacuum truck. An environmental agency will be contacted for remediation. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and		
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
