13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Burnett is requesting a variance to the following APD conditions of approval:

1. Page 3 - Candidate Conservation Agreement (Last paragraph)

Since the CCA program is a voluntary program, Burnett does not feel that this should be a condition of approval on an APD.

2. Page 14 - Watershed

Because this well location is a low cave/karst occurrence area we do not feel that this condition is necessary since the risk is low. Berming a well pad will also create ponding issues during rainy season.
