| | | | <input type="checkbox"/> Other |

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

It should be noted that nitrogen is inherently found throughout the Pecos Slope Field.

Due to an unacceptable level of nitrogen found in the gas from this specific well, it has been necessary to temporarily Shut-in this well. It is our understanding that Transwestern has dictated the "acceptable level" of nitrogen in the gas they accept from Agave Energy Company (Purchaser).

Last Production Date: Production has been shut-in since February 2012.

The protracted status of this specific well is due to the failures of Agave Energy Company in the design, the construction, and operation of their nitrogen removal plant.

It is our intent to return this specific well to production in the next 30 days.

**Approved to shut in well for 30 days.
 Submit 5th day production startup via sundry notice.
 If production does not resume within 30 days
 submit sundry with reasoning and new time frame.**

14. I hereby certify that the foregoing is true and correct. Name (Printed/Typed)
