13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well is drilled at the above location by approved NMOCD NSL Administrative order # 5001 dated February 13, 2004. It is presently completed as a vertical Loco Hills Paddock well with total of 22 perforations from 4556' to 4818'. We now propose to cut a window in the 7" production casing within the LHP perforations and drill an approx. 2000' lateral hole in the present Loco Hills Paddock zone. The end of the lateral is proposed to be @ Unit B, 330' FNL, 1650' FEL in Sec 14 T17S, R30E as a standard location. This lateral hole will be drilled and treated as recommended our service company. This horizontal well will continue to be produced to the existing Gissler A2 Tank Battery on the lease. An updated C102 is included.
