13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Response to 10/19/2016 NWO - 17RF001WO. The site has a fiberglass 210 barrel tank that was taken out of service in order for EOG Y Resources to comply with EPA's Spill Prevention Control and Countermeasure Rule. At this time it is not economical for EOG Y to hook the tank back up and build a berm OR for EOG Y to haul the tank from the location to our yard. For the year 2016 this well produced on an average of 1 day a month (with the exception of May 2016 when it produced for 23 days). At this time EOG Y Resources can't produce this well on a more regular basis because Lucid (Agave) plant is not fully operational due to the nitrogen issues found in the gas. EOG Y hopes that in the future Lucid (Agave) will resolve the plant issue and that we will be able to fully produce this well. In the event that we are able to fully produce this well, we will need the tank that is currently at the location to be out back into service. EOG Y Resources will re-evaluate this well and the out of service tank by February 2018. Once re-evaluated, EOG Y will issue an updates Sundry Notice to the BLM Roswell Field Office.
