OXY USA WTP LP respectfully requests to temporarily abandon this well. The well was producing from the Blinberry zone, the ESP failed and it was evaluated as uneconomical to repair and return to production at this time. Additional reserves are present in the wellbore by recompleting uphole in the Paddock formation. These reserves are uneconomic to target at this time, so OXY would like to TA the wellbore so that they are available in the future.

1. POOH w/ prod equipment, RIH & set CIBP @ +/-3944' & cap with minimum 25 rck cement

3. RU pump truck, circulate well with treated water, pressure test casing to 500# for 30 min.
