Describe Cause of Problem and Remedial Action Taken.*

A 6" fitting broke off the filter trailer due to corrosion. The facility inlet was immediately shut and locked out to stop the release. Repairs were made and the unit is back in operation.

Describe Area Affected and Cleanup Action Taken.*

Approximately 10bbls produced water was released into lined containment. A vacuum truck was dispatched and recovered all 10bbls of produced water from lined containment. The containment is located on the Northeast side of location and the liner and containment were visually inspected for holes and none were found. No further action is necessary

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
