MCCAW ENTERPRISE LLC
202 CROSSBOW ROAD
ARTESIA NM 88210-

Dear Operator:

A review of our records and recent inspection(s) indicate that the subject well(s) has been shut-in for an extended period of time. Rule 19.15.25.8 (3) **WELLS TO BE PROPERLY ABANDONED** of the Rules and Regulation of the Oil Conservation Division provides that a well may be shut-in no longer than sixty days after suspension of drilling operations, upon determining that the well is no longer usable (e.g., a dry hole), or one year after last production.

To comply with guidelines as established in the Rules and Regulations, corrective actions must be taken immediately and the well(s) brought into compliance.

The detail section below indicates preliminary findings and/or probable nature of the violation.

The following options are

1. Immediately restore the well(s) to production, injection or disposal as applicable. Submit Form C-103 stating how and when wells became active and monthly file electronically Form C-115
2. Request 'Temporary Abandoned' status pursuant to Rule 19.15.25.13 on Form C-103, which requires that you set a plug and conduct a mechanical integrity test
3. Submit a proposal to 'Plug and Abandon' the well(s) pursuant to Rule 19.15.25.9 on Form C-103 and, proceed with plugging procedures on a timely basis after the proposal has been evaluated, amended and/or approved

In the event that a **"PLAN OF ACTION"** is not received within thirty days of this letter and all compliance issues completed by the "Corrective Action Due By" date shown above, further enforcement will occur
