Describe Cause of Problem and Remedial Action Taken.*

The cause is equipment failure; corroded flowline. 25 bbls of produced water was spilled inside lined SPCC containment. All of the fluids were recovered. The containment liner was inspected immediately after the spill occurred. Based on the inspection, there is no evidence that the spilled fluids have left the containment.

Describe Area Affected and Cleanup Action Taken.*

The environment was not impacted by this spill. All fluids were contained inside lined SPCC containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
