13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Permission to cement 2nd stage only.

11/17/17 Drilling 8-3/4" hole, looking for 7" casing point in top of Cisco Reef. Started losing partial returns and called TD at 8620'. Ran 7" casing with DV-ECP combination tool on top of bottom joint of casing.

While running casing and washing down to bottom, ECP set 7' off bottom. Over pulled 2000,000# over string weight but packer was very set and packed off, preventing circulating or cementing bottom joint (1st stage). TD 8620' bottom casing shoe 8613'. Top DV tool 8540'.

Spoke with Ray Podany with OCD (9:30am 11/17/17) and Charles Nimmer with BLM (10:37am 11/17/17) and received permission to open DV and cement from DV up.

Opened DV tool and cemented with 100sx C lead and 700 sx C tail. Circulated 207sx to surface.
