	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Hi Mark,

Thank you for working on the surface set depth. I'm sorry to hear it has been difficult. From your email below I read that you identify the top of the rustler as 588ft and are advising setting casing 70ft into the rustler at 658ft.

We will include 588ft as our minimum surface casing setting depth in our programs and include it in our sundries for the remaining portions of the well.

Thank you,

William Turner

Sr. Drilling Engineer

Subject: [EXTERNAL] Mr. Turner, I am trying to work threw BLM NM IT4RM dysfunction in 24 and 26 Corral Canyon 36-25

The two wells have taken and been a save to server error resulting in lost intellectual knowledge in revisions December, 05, 2017 and reported to Santa Fe BLM SO. The other corral canyon wells went well in the Interior NM BLM IT4RM data
