(For Division Use Only)

APPLICATION FOR EXCEPTION TO NO-FLARE RULE 19 15 18 12

(See Rule 19 15 18 12 NMAC and Rule 19 15 7 37 NMAC)

- A Applicant Mack Energy Corporation - 013837
whose address is P O Box 960, Artesia, NM 88210-0960
hereby requests an exception to Rule 19 15 18 12 for 90 days or until
_____, Yr _____, for the following described tank battery (or LACT)
Name of Lease Mosquito State (30-005-64167) Name of Pool Wildcat, San Andres
Location of Battery Unit Letter O Section 5 Township 14S Range 29E
Number of wells producing into battery 2
- B Based upon oil production of 3 barrels per day, the estimated * volume
of gas to be flared is TSTM MCF, Value _____ per day
- C Name and location of nearest gas gathering facility
DCP Midstream
- D Distance 7.5 miles Estimated cost of connection Dependent on production volume
- E This exception is requested for the following reasons The gas this lease is too small to measure

OPERATOR

I hereby certify that the rules and regulations of the Oil Conservation Division have been complied with and that the information given above is true and complete to the best of my knowledge and belief

**Notice to Oil and Gas Facilities and Operators Flaring Gas in
New Mexico**

SANTA FE, NM – The Oil Conservation Division (OCD) encourages all oil and gas facilities with flare stacks and well operators that are flaring gas to upgrade their *Fire Awareness Programs* this year. New Mexico State Forestry reports that 370 fires burned 33,154 acres on state and private land in calendar year 2017.

Open flames and gas flares should be monitored carefully and oil and gas operators should create a defensible space to help prevent wildfires. Defensible Space is the area around a structure where combustible vegetation that can spread fire has been cleared, reduced or replaced. This space acts as a barrier between a structure and an advancing wildfire.

This means that as a general rule of thumb, the area around staffed flaring facilities should be mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris should be cleared in the area for a distance of at least one and one half times the height of the stack.

If flaring is to take place at an unstaffed facility, then the mowed area around the flare stack should be increased to three times the height of the stack. On "red flag" days local fire departments should be notified prior to the flaring operations.

During the course of the upcoming fire season, it may become necessary for New Mexico State Forestry to issue fire restrictions on State and private land. Log on to www.nmforestry.com for updates or to get information on how to contact your local State Forestry District office. For the latest fire weather information please visit USDA Forest Service website:

http://qacc.nifc.gov/swcc/predictive/outlooks/monthly/swa_monthly.pdf

The Energy, Minerals and Natural Resources Department provides resource protection and renewable energy resource development services to the public and other state agencies.

CONDITIONS OF APPROVAL for FLARING or VENTING GAS

1. Venting gas is absolutely not allowed
2. Prior to flaring gas, C-129 must be filed & approved Blanket approval cannot be given for this operation
3. Flared volumes of gas are to be metered & reported
4. Flares WILL be manned at all times. Brush should be cut down to 1 or 2 inches around flare stack at least a radial distance of 2 times the height of the flare stack
5. Flares WILL NOT be left unattended.
6. No flaring operations to be conducted during red-flag days
<http://www.gacc.nmfc.gov/swcc> (go to "Predictive Services" on SWCC website) to check for red flag warnings
7. Follow safe practices for flaring guidelines.
8. Permit may be rescinded at any time by NMOCD
9. If well is able to be connected to a gas gathering system, it will be done so as soon as possible
10. Flaring of gas is prohibited. The State Forester grants an exception to the prohibition on open fires for the flaring of natural gas when the following conditions are met Unless flaring is needed for safety purposes, flaring pursuant to this exception shall not be done on days that are "red flag days" as determined by the National Weather Service or on days when the sustained wind is in excess of 25 miles per hour in the area
 - 11.1 The day is not a "red flag day" as determined by the National Weather Service and the sustained wind is not in excess of 25 miles per hour in the area
 - 12.2 The local fire department and county dispatch are notified at least 24 hours in advance of anticipated releases that will result in flaring If flaring is done by an automated system then the schedule of flaring shall be provided to the local fire department and county dispatch The area is mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris shall be cleared in the area for a distance of one and one half times the height of the stack
 - 13.3 At least one adult is on site with communications equipment adequate to reach county dispatch and the local fire department in the event of a fire The individual should also be equipped with a shovel and a water backpack pump or other equipment to deliver water to suppress a fire
 - 14.4 If flaring is to take place at an unmanned facility, then the area around the flare stack is mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris shall be cleared in the area for a distance of three times the height of the stack

OIL CONSERVATION DIVISION
NOTICE TO OIL AND GAS OPERATORS

Vented & Flared Volumes Reporting Communication

On October 19, 2015, the Oil Conservation Division issued a Notice to Operators that implemented the "Non-Transported Disposition" Code "F" for flared gas and to report vented volumes utilizing the existing "V" code for any vented gas. The change became effective for November, 2015 production month with reporting date of January 15, 2016

The Gas Capture Committee's continuing evaluation of volumes being reported determined that not all Operators are following the requirement to report flared and vented volumes. Out of 603 well Operators active in the state, only 51 Operators are reporting volumes using the "V" and "F" code.

It is very important that all Operators in New Mexico report flared and vented volumes since part of the evaluation will help determine any policy or requirements setting goals for reduction of flared gas

We urge all companies to work with their operations and production accounting groups to ensure proper production reporting.

DAVID R. CATANACH, Director

Instructions on filing Form C-115

http://www.emnrd.state.nm.us/OCD/documents/C115_FullInstructions10.2017.pdf

RULES

19.15.7.24 OPERATOR'S MONTHLY REPORT (Form C-115):

A. An operator shall file a form **C-115** for each non-plugged well completion for which the division has approved a form **C-104** and for each secondary or other enhanced recovery project or pressure maintenance project injection well or other injection well within the state, setting forth complete information and data indicated on the forms in the order, format and style the director prescribes. The operator shall estimate oil production from wells producing into common storage as accurately as possible based on periodic tests.

19.15.18.12 CASINGHEAD GAS:

F. Pending connection of a well to a gas-gathering facility, or when a well has been excepted from the provisions of **Subsection A of 19.15.18.12 NMAC**, the operator shall burn all gas produced and not used and report the estimated volume on form **C-115**.

Thank you for your assistance in this matter. If you have any questions, please contact the appropriate OCD District Office
