Hi Emmons,

I just chatted with Oscar and you are good to set spacing gel at 1700 as this was a dry hole.

Ms Sanchez,

We set the plug from 2170 to 1700 ft. We were supposed to be up at 1570 but apparently we had a thief zone down the hole. I have tried to call but have been unable to reach you. I am trying to see if we can have permission to set salt water spacing gel from 1700-685 and then cement to surface or if the BLM is requiring us to proceed differently?

Ms Sanchez,

Jalapeno is requesting your approval to P&A the Duncan federal #12 by setting a cement plug from 2170-1570, salt water spacing gel from 1570-685 and then cement from 685-surface. We have also scheduled par 5 to perform the plug job and are scheduled for tomorrow morning. Please let me know if I need to change anything. Thanks for your help
