13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

V-F Petroleum Inc. has set up a flair to alleviate unforeseen pressure build up in the well bore that has reached the limits of the stuffing box. The well has been shut in for several months due a DCP Force Majeure event that has no end in sight. We are currently moving a pulling unit onto location with plans to kill the well. V-F Petroleum Inc. request permission to flair 500 MCFPD of Royalty Free gas for 3 days to remedy the problem and return the well to a safe condition.
