## 12. CHECK THE APPROPRIATE BOX(ES) TO INDICATE NATURE OF NOTICE, REPORT, OR OTHER DATA

TYPE OF SUBMISSION	TYPE OF ACTION			
<input type="checkbox"/> Notice of Intent	<input type="checkbox"/> Acidize	<input type="checkbox"/> Deepen	<input type="checkbox"/> Production (Start/Resume)	<input type="checkbox"/> Water Shut-Off
<input checked="" type="checkbox"/> Subsequent Report	<input type="checkbox"/> Alter Casing	<input type="checkbox"/> Hydraulic Fracturing	<input type="checkbox"/> Reclamation	<input type="checkbox"/> Well Integrity
<input type="checkbox"/> Final Abandonment Notice	<input type="checkbox"/> Casing Repair	<input type="checkbox"/> New Construction	<input type="checkbox"/> Recomplete	<input type="checkbox"/> Other
	<input type="checkbox"/> Change Plans	<input checked="" type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

5/9/18 - MIRU and bled well down. NU BOP.

5/10/18 - RIH with freepoint tool, stacks out at 7276 ft. Packer at 7665 ft. Tubing 100 percent free at 7260 ft. NOTE: Ok from Jim Amos Carlsbad BLM to cut tubing at 7260 ft. Cut tubing at 7260 ft and POQH. Set a 5-1/2 inch CIBP at 7240 ft. Loaded and circulated to surface 120 bbls plugging mud. Spotted 25 sx Class H cement on top of CIBP to 7037 ft calc TOC.

5/11/18 - RIH with gyro to 6000 ft.

5/14/18 - Perforated 5-1/2 inch casing at 6660 ft. Established pump rate through perfs. Squeezed with 26 sx Class H cement to 6500 ft calc TOC.

5/15/18 - Did not tag cement. Witnessed by Joe Salcido with Carlsbad BLM. Spotted 40 sx Class H inside/outside cement plug from 6720 ft - 6523 ft calc TOC. WOC to tag. Tagged TOC 6279 ft.

Witnessed by Joe Salcido BLM. Perforated 5-1/2 inch casing at 6050 ft. Pumped and displaced 443 sx cement from 6100 ft - 5890 ft calc TOC. WOC to tag.

RECLAMATION  
DUE 12-1-18RECLAMATION PROCEDURE  
ATTACHEDGC 6-14-18  
Accepted for record - NMOC

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #422445 verified by the BLM Well Information System  
For EOG Y RESOURCES INC, sent to the Carlsbad  
Committed to AFMSS for processing by PRISCILLA PEREZ on 06/04/2018 (18PP1004SE)

Rio Penasco MF Federal #1  
Section 11-T19S-R25E  
Eddy County, New Mexico

Form 3160-5 P&A continued:

5/17/18 - Did not tag cement across Abo top. Pumped and displaced 40 sx Class C cement from 4080 ft - 3892 ft calc TOC. WOC to tag. Full returns while pumping and displacing cement. Did not tag cement. Pumped and displaced 40 sx Class C cement from 4080 ft - 3892 ft calc TOC. WOC to tag. Full returns while pumping and displacing cement.

5/18/18 - Tagged TOC at 3900 ft. Cement plug covers Abo top. Witnessed by Joe Salcido with Carlsbad BLM. Perforated 5-1/2 inch casing at 2420 ft and 2380 ft (second perms added by BLM). Pumped and displaced 35 sx Class C cement from 2471 ft - 2300 ft calc TOC. WOC to tag.

5/21/18 - Tagged TOC 2302 ft. Plug covers Glorieta top. Witnessed by Joe Salcido with Carlsbad BLM. Perforated 5-1/2 inch casing at 1260 ft and 1220 ft. Pumped and displaced 35 sx Class C cement from 1310 ft - 1160 ft calc TOC. Tagged TOC 1220 ft. Will re-spot plug. Pumped and displaced 25 sx Class C cement from 1220 ft - 1100 ft calc TOC. WOC to tag. Perforated 5-1/2 inch casing at 750 ft.

5/22/18 - Tagged TOC 1080 ft. Plug covers 8-5/8 inch casing shoe. Pumped and displaced 35 sx inside/outside cement plug from 800 ft - 650 ft calc TOC. WOC to tag. Tagged TOC 658 ft. Plug covers San Andres top. Tag witnessed by Joe Salcido with Carlsbad BLM. Perforated 5-1/2 inch casing at 450 ft. Pumped and displaced 35 sx inside/outside cement plug from 500 ft - 350 ft calc TOC. WOC to tag.

Tagged TOC low at 458 ft. Will re-spot plug. Pumped and displaced 25 sx cement to 350 ft calc TOC.

5/23/18 - Tagged TOC 218 ft. Plug covers 13-3/8 inch casing shoe. Pumped and circulated 32 sx Class C cement down 5-1/2 inch casing to perf at 100 ft up 8-5/8 inch casing. Full returns of cement to surface.

5/31/18 - Cut off wellhead. Installed dry hole marker and cut off anchors. WELL IS PLUGGED AND ABANDONED.

### Reclamation Objectives and Procedures

**Reclamation Objective:** Oil and gas development is one of many uses of the public lands and resources. While development may have a short- or long-term effect on the land, successful reclamation can ensure the effect is not permanent. During the life of the development, all disturbed areas not needed for active support of production operations should undergo "interim" reclamation in order to minimize the environmental impacts of development on other resources and uses. At final abandonment, well locations, production facilities, and access roads must undergo "final" reclamation so that the character and productivity of the land and water are restored.

The long-term objective of final reclamation is to set the course for eventual ecosystem restoration, including the restoration of the natural vegetation community, hydrology, and wildlife habitats. In most cases this means returning the land to a condition approximating or equal to that which existed prior to the disturbance. The final goal of reclamation is to restore the character of the land and water to its pre-disturbance condition. The operator is generally not responsible for achieving full ecological restoration of the site. Instead, the operator must achieve the short-term stability, visual, hydrological, and productivity objectives of the surface management agency and take steps necessary to ensure that long-term objectives will be reached through natural processes.

To achieve these objectives, remove any and all contaminants, scrap/trash, equipment, pipelines and powerlines. Strip and remove caliche, contour the location to blend with the surrounding landscape, re-distribute the native soils, provide erosion control as needed, rip and seed as specified in the original APD COA. This will apply to well pads, facilities, and access roads. Barricade access road at the starting point. If reserve pits have not reclaimed due to salts or other contaminants, submit a plan for approval, as to how you propose to provide adequate restoration of the pit area.

1. The Application for Permit to Drill or Reenter (APD, Form 3160-3), Surface Use Plan of Operations must include adequate measures for stabilization and reclamation of disturbed lands. Oil and Gas operators must plan for reclamation, both interim and final, up front in the APD process as per Onshore Oil and Gas Order No. 1.
2. For wells and/or access roads not having an approved plan, or an inadequate plan for surface reclamation (either interim or final reclamation), the operator must submit a proposal describing the procedures for reclamation. For interim reclamation, the appropriate time for submittal would be when filing the Well Completion or Recompletion Report and Log (Form 3160-4). For final reclamation, the appropriate time for submittal would be when filing the Notice of Intent, or the Subsequent Report of Abandonment, Sundry Notices and Reports on Wells (Form 3160-5). Interim reclamation is to be completed within 6 months of well completion, and final reclamation is to be completed within 6 months of well abandonment.
3. The operator must file a Subsequent Report Plug and Abandonment (Form 3160-5) following the plugging of a well.
4. Previous instruction had you waiting for a BLM specialist to inspect the location and provide you with reclamation requirements. If you have an approved Surface Use Plan of Operation and/or an approved Sundry Notice, you are free to proceed with reclamation as per approved APD. If you have issues or concerns, contact a BLM specialist to assist you. It would be in your interest to have a BLM specialist look at the location and access road prior to the removal of reclamation

equipment to ensure that it meets BLM objectives. Upon conclusion submit a Form 3160-5, Subsequent Report of Reclamation. This will prompt a specialist to inspect the location to verify work was completed as per approved plans.

5. The approved Subsequent Report of Reclamation will be your notice that the native soils, contour and seedbed have been reestablished. If the BLM objectives have not been met the operator will be notified and corrective actions may be required.
6. It is the responsibility of the operator to monitor these locations and/or access roads until such time as the operator feels that the BLM objective has been met. If after two growing seasons the location and/or access roads are not showing the potential for successful revegetation, additional actions may be needed. When you feel the BLM objectives have been met submit a Final Abandonment Notice (FAN), Form 3160-5, stating that all reclamation requirements have been achieved and the location and/or access road is ready for a final abandonment inspection.
7. At this time the BLM specialist will inspect the location and/or access road. If the native soils and contour have been restored, and the revegetation is successful, the FAN will be approved, releasing the operator of any further liability of the location and/or access road. If the location and/or access road have not achieved the objective, you will be notified as to additional work needed or additional time being needed to achieve the objective.
