13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Mewbourne Oil Company has APPROVED Administrative Order SWD-1425 (dated July 3, 2013) to dispose of oil field produced water through open hole injection into the Devonian Formation. Injection occurs through 3 1/2" internally coated tubing (No tubing restriction specified). Mewbourne Oil Company requests to replace the existing 3 1/2" internally coated injection tubing with 4 1/2" internally coated injection tubing.

The above requested tubing string is easily fished (both internally and externally) inside 7" casing with standard "off the shelf" fishing tools.

Maximum injection volume will not exceed 20,000 BWPD as stated in the original SWD application.

Please see attached wellbore schematic.
