Leases: NMNM77046 (sec. 9), NMNM 81953 (Sec. 4) CA for BS pending approval by the BLM, submitted 04/2018

The Maldives 15 CTB 1 is located in Sec. 1515, SWNW, T23S, R31E, Eddy Co, NM. It is Devon's intent to commingle oil, gas, and water production from the single target formations into a single production facility. The Ko Lanta wells will flow into their designated three phase separator with the production from each of the Ko Lanta 9-4 Fed Com 518H & 528H flowing through its own three phase separator with Micro Motion Coriolis to meter the oil, mag meter to meter the water, and gas allocation to meter the gas. The VRU will be allocated back to each well utilizing each wells monthly oil production.

The Maldives 15 CTB 1 will have a total of four oil tanks that will be utilized by both wells producing to this battery. Oil, gas, and water volumes from these wells will be determined using the individual three phase separator. A common Lucid gas sales meter#(will be provided upon receipt) will be utilized for both wells. Oil from all of these wells will be sold through a common LACT Meter #(Will be provided upon receipt).

APPLICATION FOR OFF-LEASE MEASUREMENT, SALES, & STORAGE

Proposal for Kolanta 9-4 F 518H & 528H to the Maldives 15 CTB 1

Devon Energy Production Company, LP is requesting approval for Off-Lease Measurement, Sales, & Storage of the following wells:

Federal Lease: NMNM77046 (Sec. 9) and NMNM81953 (Sec. 4) CA for the BS pending approval by the BLM, submitted 04/2018

Well Name	Location	API #	Pool 40295	BOPD	MCFPD	OG
Ko Lanta 9-4 Fed Com 518H	SESE Sec. 9 & 4 -23S-31E	30-015-44864	Los Medanos, BS	900	4349	50 *
Ko Lanta 9-4 Fed Com 528H	SESE Sec. 9 & 4 -23S-31E	30-015-44865	Los Medanos, BS	900	4349	50*
Federal Lease: NMNM40	5444					i
Well Name	Location					
Maldives 15 CTB 1	NWNW, Sec. 15-23S-3	1E				

*These are proposed numbers from offset wells, actual production will be provided upon receipt.

Attached is a map that displays the federal leases and wells located in Section 9 & 4, T23S, R31E

The BLM's interest in both wells is 12.5%

Oil & Gas Metering:

The Maldives 15 CTB 1 is located in Sec. 15, WNW, T23S, R31E, Eddy County, New Mexico. It is Devon's intent to commingle oil, gas and water production from the single target formations into a single production facility. The Kolanta wells will flow into their designated three phase separator with the production from each of the Kolanta 9-4 Fed Com 518H & 528H flowing through its own three phase separator with Micro Motion Coriolis to meter the oil, mag meter to meter the water, and gas allocation meter to meter the gas. The VRU will be allocated back to each well utilizing each wells monthly oil production.

The Maldives 15 CTB 1 will have a total of four oil tanks that will be utilized by both wells producing to this battery. Oil, gas, and water volumes from these wells will be determined using the individual three phase separator. A common Lucid gas sales meter #(will be provided upon receipt) will be utilized for both wells. Oil from all of these wells will be sold through a common LACT Meter (Number will be provided upon receipt).

The Kolanta 9-4 Fed Com 518H will flow into its own three phase separator, where after separation, the gas is routed to its designated gas allocation meter (number provided upon receipt), combines with gas from the Kolanta 9-4 Fed Com 528H, then through the Lucent Sales Meter (Number will be provided upon receipt). Produced oil and water are separated, the oil flows into a heater\treater is metered with a Micro Motion Coriolis Meter (Number will be provided upon receipt), combines with the oil from the Kolanta 9-4 Fed Com 528H and flows into one of the 1000bbl. oil tanks. The water is measured with a mag mater and combines with the water from the other well and flows into a gun barrel, then into one of the 500 bbl water tanks.

The Kolanta 9-4 Fed Com 528H will flow into its own three phase separator, where after separation, the gas is routed to its designated gas allocation meter (number provided upon receipt), combines with gas from the Kolanta 9-4 Fed Com 518H, then through the Lucent Sales Meter (Number will be provided upon receipt). Produced oil and water are separated, the oil flows into a heater\treater is metered with a Micro Motion Coriolis Meter (Number will be provided upon receipt, combines with the oil from the Kolanta 9-4 Fed Com 518H and flows into one of the 1000bbl. oil tanks. The water is measured with a mag mater and combines with the water from the other well and flows into a gun barrel, then into one of the 500 bbl water tanks.

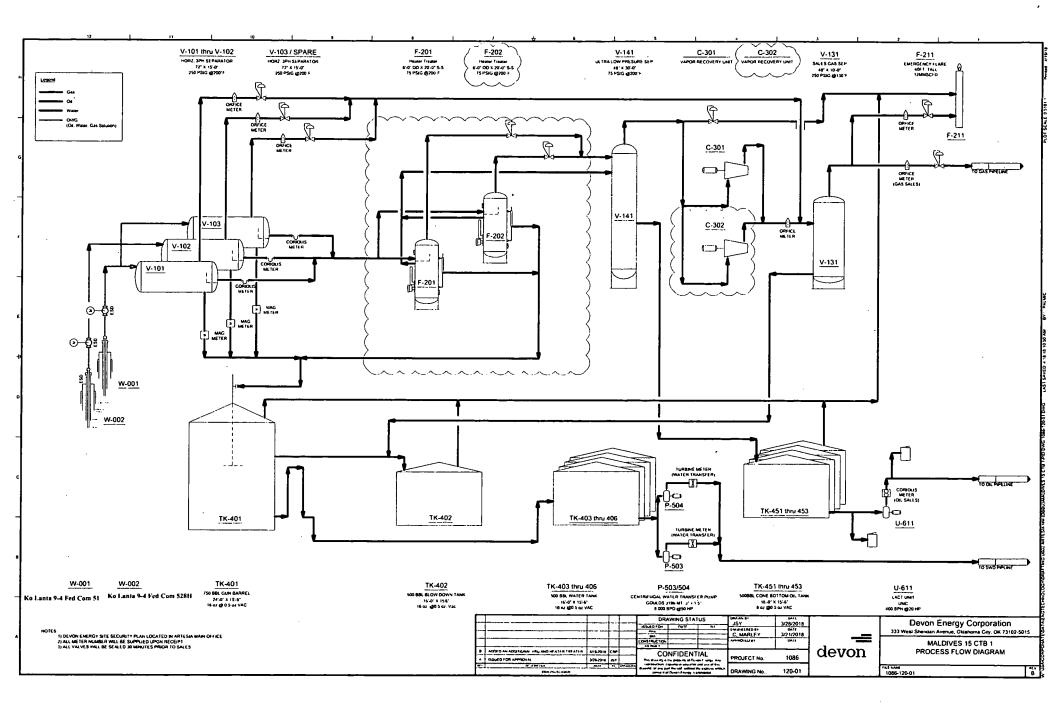

Oil Production from the Kolanta 9-4 Fed Com 518H & 528H will be allocated on a daily basis based on the Coriolis Test Meter, Mag Meter & EFM located downstream of their dedicated three phase separator. Devon will continue to operate and maintain the Micro Motion Coriolis Meter per BLM applicable regulations, notwithstanding further guidance from the local BLM in regards to proving the Micro Motion Coriolis Meter to meet applicable BLM standards. Gas production from the Kolanta 9-4 Fed Com 518H & 519H wells will be allocated on a daily basis using the gas allocation meter. The gas production from the production equipment & gas meters from the Kolanta 9-4 Fed

Com 518H & 528H will commingle into a common production line, and flow into Federal Measurement Point Meter (Number will be provided upon receipt). The gas production from the production equipment & gas meters from the Kolanta 9-4 Fed Com 518H & 528H, commingle into a common production line, and flow into Federal Measurement Point Meter (Number will be provided upon receipt.)

Process and Flow Descriptions:

The flow of produced fluids is shown in detail on the enclosed facility diagram, along with a description of each vessel and map which shows the lease boundaries, location of wells, facility, and gas sales meter. The proposed commingling is appropriate based on the BLM's guidance in IM 2013-152. The proposed commingling will maximize the ultimate recovery of oil and/or gas from the federal leases and will reduce environmental impacts by minimizing surface disturbance and emissions. The proposed commingling will reduce operating expenses, as well as, not adversely affect federal royalty income, production accountability, or the distribution of royalty.

Devon Energy Production Company, LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

Off-Lease Storage, Measurement and Sales of production Conditions of Approval June 21, 2018 Devon Energy Production Company Ko Lanta 9-4 Fed Com 518H & 528H NMNM077046

Approval of off-lease measurement is subject to the following conditions of approval:

- 1. This agency shall be notified of any change in sales method or location of the Sales point.
- 2. This agency shall be notified of any spill or discharge as required by NTL-3A. No gas may be vented/flared without proper measurement and prior approval. Any gas vented must be flared.
- 3. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per 43 CFR 3179 to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer. These volumes are royalty bearing and shall be reported on OGOR "B" as disposition code "33".
- 4. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments and/or product accountability.
- 5. This approval is subject to like approval by the New Mexico Oil Conservation Division.
- 6. Additional wells require additional approvals.
- 7. This approval does not constitute right-of-way approval for any off-lease/Unit activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
- 8. Approval for off-lease from various sources is a privilege which is granted to lessees/operators for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
