13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Devon Energy Production Company, LP respectfully requests approval to utilize secondary separators during initial production at the Lusitano 27 CTB 6. The following procedures will be performed:

Each well from the first package of three wells drilled, will have its own dedicated secondary separator.

Once the second package of three wells comes online, all 6 wells will have their own dedicated separator. All meters of the secondary separators will be zero'd out and re-configured for their individual well prior to initial production.

This change is designed to be temporary to help ensure that wolcamp appraisal tests for peak rates are not hindered by separation issues due to incorrect composition and/or increased flow rates
