13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Attention Jennifer Sanchez:

GC 10-12-18  
Accepted for record - NMOC

In reference to EC #406730

The intermediate shoe is at 43637. Isolation Scanner Cement Evaluation Log shows the TOC to be 41607. After running the cement evaluation log we pressure tested the 5-1/2" x 9-5/8" annulus to 900 psi. The pressure held steady with minimal bleed off indicating that we have good isolation. Attached is the Isolation Scanner Log and test chart from the 5-1/2" x 9-5/8" annulus pressure test.

RECEIVED

OCT 12 2018

Attached: Intermediate Pressure Test &amp; GR-CCL Log.
