13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

OXY USA INC requests approval of royalty free use of gas used for gas lift operations at the Sand Dunes battery located in Section 18 T24S R31E at LAT 32.2233, LONG -103.812737.

Gas for lift operations will be pulled downstream of the gas FMPs. It is then sent to four compressors before being sent to individual wells. Fuel gas for each compressor is approximately 25 MCFPD based on manufacturer's published usage rate.

Each well has an individual meter that measures the volume used for gas lift. The table below lists each well on gas lift and the respective meter number. Volumes range from 300 MCFPD to 1100 MCFPD.
