13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

COG Operating LLC respectfully requests to change the flowlines from steel surface pipe to 4" poly surface lines. The working psi will be below 125psi and used to transport produce water, oil and gas from the wells below to the Skelly 907 Battery:  
Skelly Unit #715 (3001538346)- 3144'  
Skelly Unit #725 (3001538378)- 1473'

Flowline routes will be as shown on attached map. Replacing these lines will reduce footprint by a total of 3128'.
