	a failed MIT. COG Operating L	-		• • •	
we can determine whether we have a tubing or packer leak. If It's a hole in tubing, we would like to replace any failed jts of I					
and continue utilizing this string. However, if all the tubing is in poor condition we do have plenty of ICP tubing in inventory. If it's a packer leak, use mud to kill the well, then pull and replace the packer. Run the same tubing design and setting depth					
	-	lace the packer. I	Run the same tubing de	esign and setting depth	
Please see attached proposed	procedure and WBD.
