Summary of Changes to APD Submission

Chevron respectfully requests the ability to change the cement details for the upcoming production cement job planned to be performed on this well. When this well was previously sundried to change the target formations, the submitted cement details did not reflect our current plan that is aligned with what other wells for these same targets are pumping.

Cicada Unit 19H

Slurry	Type	Top	Bottom	Weight	Yield	%Excess	Sacks	Water
Production								
Lead	Class C	9000	19,494	14.5	1.4	10	1888	6.79
Tail	Class H	19,494	20,494	15.0	2.16	10	117	9.22
