TA Status

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation is respectfully requesting permission to extend the TA status of this well. We are currently setting a pump jack on a well just to the north. If this appears to be profitable, then we will run rods and pump this well. Within 24 months we should be able to have the economic evaluation complete and be able to determine if a workover is feasible.

NOTE: Mechanical Integrity Test was conducted on 5/18/02.

**New Mechanical Integrity Test Will Be
Required To Extend Temporary Abandonment
Approval After 05/18/2007.**

APPROVED FOR 12 MONTH PERIOD
ENDING MAY 18 2007

14. I hereby certify that the foregoing is true and correct.
