13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please amend the Indian Basin Field Commingle agreement as follows: Indian Hills Unit Gas Com #56 gross production will be sent to the same separator as the Indian Hills Unit Gas Com #27 at Station 120 Satellite Facility (see attached flow diagram). The #56 well will be piped into the test header with the wells from section 20, (these wells are Indian Hills Unit wells). When the #27 well is being tested, using the Indian Hills Gas Com Lease separator, the #56 well will be tested, using the test separator used to test the Indian Hills Unit wells. The wells from section 20 will all be sent to the Indian Hills Unit production separator during this test period so that the Indian Hills Gas Com production is not commingled with the Indian Hills Unit production. After being separated and measured, the production from this well will be handled as shown in the original commingle agreement. If you have questions or need clarification, please call me at (915)687-8321.
