13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well is presently completed as a water injection well with perforations at San Andres 3103' to 3115' and 3367' to 3486'. We have determined that there is a probable hole in the casing and plan to plug and abandon this well. We have already set a CIBP at 3050' and pumped 35' of cement on top of plug. Our cement bond log indicated TOC for the 4 1/2" csg is 1272'. We have perforated 4 1/2" csg with 4 holes at 1240' and could not pump into it. We have also perforated 4 1/2" csg with 4 holes at 517' and circulated cmt to surface. We plan to complete final plugging of this wellbore by circulating cmt in the 4 1/2" csg from 1400' to the surface. We will install a BLM dry hole marker and restore location as required by the BLM. We have received notice from NMOC that this work must be completed on this injection well, so the timing is important.
