## DRILLING PROGRAM

Burch Keely Unit No. 947  
1345' FNL and 660' FWL  
Section 30-17S-30E  
Eddy County, New Mexico

### 10. Anticipated Starting Date and Duration of Operations

Starting date will be scheduled upon approval.

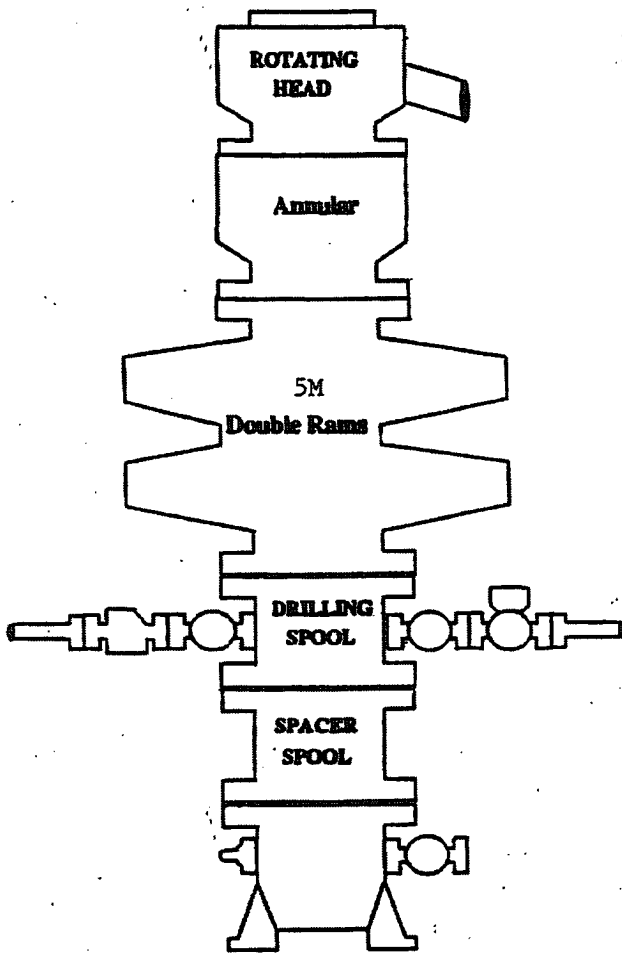

Duration of Operations: Once commenced, the drilling operations should be completed in approximately 21 days. If the well is productive, an additional 30 to 60 days will be required for completion and testing of the well.

## SURFACE USE AND OPERATING PLAN

Burch Keely Unit No. 947  
1345' FNL and 660' FWL  
Section 30-17S-30E  
Eddy County, New Mexico

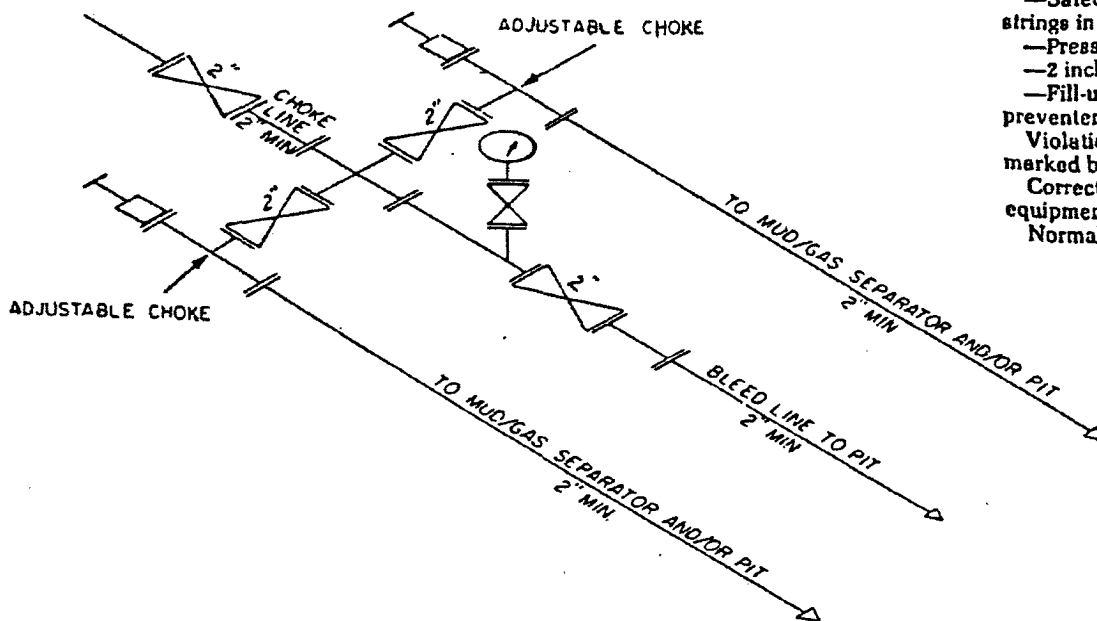

- 1.(c) Directions to Locations: From Loco Hills, proceed west on U.S. 82 for 1.8 miles. Turn south on General American Road (CR 216) and proceed 6/10 miles. Turn east on lease road and proceed 2/10 miles. Turn south and proceed 1/10 miles, access road and location are west side of lease road.
2. A new access road of 455' will be necessary.
- 4.(a) If productive, this well will use Satellite "G".

# BOPE SCHEMATIC

ONSHORE OIL AND GAS ORDER NO. 2

- 2M system:
- Annular preventer, or. double ram, or two rams with one being blind and one being a pipe ram \*
  - Kill line (2 inch minimum)
  - 1 kill line valve (2 inch minimum)
  - 1 choke line valve
  - 2 chokes (refer to diagram in Attachment 1)
  - Upper kelly cock valve with handle available
  - Safety valve and subs to fit all drill strings in use
  - Pressure gauge on choke manifold
  - 2 inch minimum choke line
  - Fill-up line above the uppermost preventer.
- Violation: Minor (all items unless marked by asterisk).  
Corrective Action: Install the equipment as specified.  
Normal Abatement Period: 24 hours.

SEP 07 1999

Gentlemen:

With regard to our telephone conversation of September 2, 1999, a review of our records has found discrepancies in the casing requirements section of the conditions of approval for your APD's. As per our meeting on July 7, 1999, our office had agreed with your recommended casing procedures for shallow wells of 6000 ft. or less in T. 17 S., Rgs. 29, 30 and 31 E., NMPM. In order to correct the discrepancies, this letter states the language to be used for the conditions of approval casing requirements for all your existing APD's

Conditions of Approval-Drilling amended as follows:

II. Casing requirements in T. 17 S., Rgs. 29, 30 and 31 E. for shallow wells less than 6,000 ft.

1. 8-5/8 inch surface casing should be set at approximately \_\_\_\_ ft. in the Rustler Anhydrite or in the case the salt occurs at a shallower depth above the top of the salt. The surface casing shoe shall be set in the anhydrite to ensure adequate sealing. The operator is required to use an excess of 100% cement volume to fill annulus. If cement does not circulate to surface the operator may then use ready mix cement to fill the remaining annulus.

2. The minimum required fill of cement behind the 5 1/2 inch production casing is to place the top of the cement 200 ft. above the top of the uppermost hydrocarbon bearing interval or to the base of the salt.

These requirements supercede those issued in your existing, approved APD's for the shallow wells located in T. 17 S., Rgs. 29, 30 and 31 E., NMPM. If you have any question regarding this matter please call John S. Simitz at (505) 627-0288 or Armando A. Lopez at (505) 627-0248.

Sincerely,

A handwritten signature in cursive script, reading "Larry D. Bray". The signature is written in dark ink and is positioned above the printed name and title.

Larry D. Bray  
Acting Assistant Field Office Manager,  
Lands and Minerals
