Re: Application of EOG Resources, Inc. for administrative approval of a 227.96-acre non-standard gas spacing unit for its Yangtze A 3 Fee Well No. 1H in Irregular Section 3, Township 16 South, Range 25 East, NMPM, Eddy County, New Mexico.

Dear Mr. Fesmire:

EOG Resources, Inc. ("EOG"), pursuant to the provisions of Division Rule 104 D (2)(b) and (c) adopted on January 18, 1996, hereby seeks administrative approval of a 227.96-acre non-standard gas spacing and proration unit for the Yangtze A 3 Fee Well No. 1H to be drilled to test the Wolfcamp formation from a surface location 934 feet from the North line and 310 feet from the East line and a bottomhole location of 918 feet from the North line and 660 feet from the West line in Irregular Section 3, Township 16 South, Range 25 East, N.M.P.M., Eddy County, New Mexico.

EOG's well will test the Wolfcamp formation which is developed on 320-acre spacing pursuant to the general rules of the Division.

This non-standard gas spacing and proration unit is necessary because of a variation in the legal subdivision of the United States Public Land Surveys. This unit is comprised of contiguous lots which lie wholly within a single governmental section and are joined by a common side. This non-standard spacing unit is a result of an oversized section on the northern township line. EOG plans to drill the Yangtze C 3 Fee Well No. 1H in the south 320 acres of this section and the Yangtze B 3 Fee Well No. 1H immediately north. Due to the oversized nature of the section, that leaves the 227.96 acres on the north end of the section unallocated. Attached as **Exhibit A** is the C-102 showing the subject spacing unit. **Exhibit B** is a plat showing the offsetting spacing units. EOG is
