13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work and approximate duration thereof. If the proposal deepens directionally or recompletes horizontally, give subsurface location and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirement, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection)

Devon Energy Production Company, LP is applying with the NM OCD for approval to downhole commingle the Red Lake Queen-Grayburg-San Andres (51300) and the Northeast Red Lake Glorieta Yeso (96836) pursuant to 19.15.5.303 (C) 3 (b) Exceptions for wells located in pre-approved pools or areas. This pool was pre-approved by NM OCD Division order PC-1108.

The San Andres is perforated at 1767'-2369' and the Yeso is perforated from 2961'-3284'. Average production from the SA is 10 oil and 30 gas. Average production from the Yeso is 8 oil and 23 gas.

The allocation method is by ratio of stabilized production. For the Yeso, oil is 44.4% and gas is 43.4%. For the San Andres formation, oil is 55.6% and gas is 56.6%.

Commingling these two pools will not reduce the value of the total remaining production and the ownership between the two pools is identical.
