| Less than 50 feet   (20 points)  | Type: Drilling ☑ Production ☐ Disposal ☐   Work over ☐ Emergency ☐   Lined ☒ Unlined ☐   Liner type: Synthetic ☒ Thickness 12 mil Clay ☐  | Below-grade tank  Volume:bbl Type of fluid:  Construction material:  |   |
| Source, or less than 1000 feet from all other water sources.)  Distance to surface water. (horizontal distance to all wetlands, playas, irrigation canals, ditches, and perennial and ephemeral watercourses.)  Ranking Score (Total Points)  By this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite of offsite in the facility of the facility | Depth to ground water (vertical distance from bottom of pit to seasonal high  | 50 feet or more, but less than 100 feet  | (10 points) XXXX  |
| Distance to surface water: (horizontal distance to all wetlands, playas, irrigation canals, ditches, and perennial and ephemeral watercourses.)    200 feet or more  | ·   |  |   |
| If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite of the place of site of the facility NA (3) Attach a general description of remedial action taken including remediation start date and end date.  (4) Groundwater encountered: No Yes If yes, show depth below ground surface ft. and attach sample results.  (5) Attach soil sample results and a diagram of sample locations and excavations.  Additional Comments: Work plan for reopening and closure of a drilling pit. The drilling pit material will be excavated & stockpiled. An encapsulation trench will be excavated and lined with a 12 mil. synthetic liner on former drilling pit site. Drilling pit contents will then be emplaced into the encapsulation trench. A 20 mil synthetic liner will then be placed over the pit contents with a minimum of a 3' over lap of the underlying trench areas. The encapsulation trench will then be backfilled to grade using a minimum of 3' of clean soil and like material. A one call and 48 hour notice will be provided to the Oil Conservation Division before pit closure actions begin.  Pit Closure actions to begin by NA. Ending date NA  Pit will be reopened and closed per OCB requirements  I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has   |   | 200 feet or more, but less than 1000 feet  | (10 points)   |
