13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Chesapeake, respectfully, request permission for the following:

For the first BOP installation (drilling out below 13 3/8" casing), Chesapeake would like to receive approval to install a 13 5/8", 2000 psi minimum operating pressure Annular Preventer rather than the original proposed 11" 5000 psi stack with annular preventer, pipe rams and blind rams. Chesapeake doesn't feel the interval from surface casing shoe (765') to intermediate casing point (4350') warrants anything more than a single shut-in device (annular prevent, a.k.a. Hydril) that has a working pressure of at least 2000 psi. Test as per Onshore Order 2. Per conversation between Randy Patterson with Chesapeake and Wesley Ingram of the BLM of Carlsbad, NM (phone 505-234-5982, fax 505-234-5927), we should submit the sundry notice request via fax for his review and probable subsequent approval.
