TA Status

13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation respectfully requests an extension on the following well TA status in order to evaluate and possible recompleat to the Cisco Canyon along with other area wells. This zone had not been tested in the area prior to the intent to P&A being sent.

We have several procedures written to test this interval in surrounding wells which are currently being processed. Plans are to test this interval in area wells within the next 12 months if all the land issues can be resolved.

We would like to test all options in this area before giving up any of our well bores.

MIT was conducted on 7/20/04.
