RE: Application to Pool Commingle Production
Oil and Gas Department

Chevron U.S.A., Inc. respectfully requests administrative approval to surface commingle the oil, gas, and water production from the Morrow, Bone Springs, and Brushy Canyon Pools, on the Chevron's Pardue Farms 26-1 Battery located at Pardue Farms 26, well # 1; 1980' FNL & 660' FWL, Section 26, T23S, R28E, Eddy County, New Mexico.

The wells included in this battery, currently produce into four separate tanks, of which are badly in need of repair. Pending administrative approval, Chevron proposes to upgrade and rebuild Pardue Farms 26-1 Battery, by removing the four tanks and installing 2 new tanks. The production from the Pardue Farms well # 1 will continue to go through a separate Gas Production Unit, and the Pardue Farms # 2, # 3, and # 4 production, will go into the two new tanks. Well # 2 is down hole commingled by Administrative Order DHC-2756 in the Brushy-Canyon and the Bone Springs, and is allocated respectively, by oil-53% /gas-34% and oil-47% and gas-66%.

Chevron is the operator with varying working interest, in the Pardue Farms wells # 1, # 2, # 3, and # 4. All working interest owners, royalty interest owners, and over-riding royalty interest owners, have been notified. Attached in support of this request is a copy of the notification letter; a table showing oil production volumes, gravities, and monetary values for each of the wells, and a proposed schematic diagram and a lease plat. Production will be allocated to each well with the use of metering separators, located at the Pardue Farms 26-1 Commingled Battery and will be installed in accordance with applicable provisions of the NMOCD's "Manual for the installation and Operation of Commingling Facilities. Commingling will not be significantly impacted by the proposed action. Environmental exposure and operating costs will be reduced by having fewer tank storage facilities to operate and maintain.

For your convenience, I have enclosed an envelope with my return address, so that the decision for this application can be sent directly to me. If you require additional information or have any questions, please contact me by telephone at 432-687-7261, or by email at chay@chevron.com

Sincerely,

A handwritten signature in cursive script that reads "Carolyn Haynie".

Pool Lease Commingle
Pardue Farms 26-1 Lease
Section 26, T23S, R28E,
Eddy County, New Mexico

RE: Notice of Intent to Pool Lease Commingle Oil, Gas, & Water Production

Working Interest, Royalty Interest, and Overriding Royalty Interest Owners:

Chevron MidContinent, L.P., formerly Pure Resources, L.P., respectfully gives notice of intent to commingle the oil, gas, and water production from the Morrow, Bone Springs, and Brushy Canyon formations, from the Pardue Farms 26-1 Battery, located at Pardue Farms 26 well # 1; 1980' FNL & 660' FWL, Section 26, T23S, R28E, Eddy County, NM.

Chevron is the operator of the Pardue Farms Lease with working interest in the following wells: Pardue Farms 26 #1, #2, #3, and #4. A table listing the wells proposed for commingling, and a plat of the lease is enclosed, for your information. The wells included in this battery, currently produce into four separate tanks, of which are badly in need of repair. Pending administrative approval, Chevron proposes to upgrade and rebuild Pardue Farms 26-1 Battery by removing the four tanks and installing two new tanks. Gas and oil production will be allocated to each of the wells with the use of the metering separators, prior to commingling, and in accordance with the applicable provisions of the NMOCD's "Manual for the Installation and Operation of Commingling Facilities". The production from the Pardue Farms 26 wells (# 1, # 2, # 3, & # 4), will be re-routed to the new battery and surface commingled. This proposal is the most economical process for the Pardue Farms 26-1 Battery, to correct the potential of environmental leaks. Commingling will not reduce the actual commercial value of the production and will substantially lower operating cost.

Any objections to this commingle must be sent to the **New Mexico Oil Conservation Division; 1220 South St. Francis Drive; Santa Fe, NM 87504**, within 20 days of receipt of this notification.

If you require additional information, please contact me, by telephone at 432-687-7261, or by email at: chay@chevron.com.

Sincerely,

A handwritten signature in cursive script, appearing to read "Carolyn Haynie", written over a horizontal line.
