**Additional Comments.**

We plan to trench bury the drilling pit at the Todd 27E Federal #5 As per rule 50 of the Pit and Below-Grade Tank Guidelines, we will line the trench with 12 mil liner

and bury pit contents and liner then cover with 20 mil plastic We will cap with 3' of native material capable of supporting native plant growth. We will contour the pit area to prevent erosion and ponding of rainwater over the site.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.

**Stipulations for closing**  
**Of Pit**

Samples are to be obtained from pit area and analysis submitted to NMOCD prior to back filling. Notify NMOCD 24 hours prior to obtaining samples.

If burial trench is to be constructed in the pit area, samples are to be obtained from that area and analyses submitted to NMOCD prior to lining the pit, but after contaminated soils have been excavated from trench area.

Notify NMOCD 24 hours prior to beginning closure.

If pit is situated in an agricultural area pit contents must be hauled to an NMOCD approved disposal area.

Pits must be closed within 6 months of the date production casing is set.
