13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The pupose of this Sundry is to modify the blowout preventor requirements while drilling the 12-1/4" intermediate portion of the hole. Instead of using 3,000 psi. rated blowout prevention equipment when drilling from 750' to 3,500', we now propose to use 2,000 psi. rated blowout prevention equipment when drilling this interval.

This proposed change conforms to standard drilling practices while drilling in this area.

Operator also requested to test casing (13 3/8") and BOPE to 1000 psi with rig pumps.

14. I hereby certify that the foregoing is true and correct
