Subject: Globe 14 Federal # 1

Dear Shay and Linda,

In regards to the above noted well, please submit the following:

- Amended BLM's form 3160-4 that shows the correct bottom hole location and not the calculated hole location as submitted.
- Please submit the temperature survey which was ran.
- Amended BLM form 3160-5 dated 12/20/2006 that shows the top of the cement and how that top was determined.
- Amended BLM form 3160-5 dated 12/02/2006 that shows the wait on cement time for the 8 5/8" casing. Please note the time in minutes for the casing pressure test on the 8 5/8" casing.
- I'm missing the subsequent report for the 13 3/8' casing if I could get that report in from you please.

I'll go ahead a mark the C-104 for "records only" as it shows in item 46 "plugged".

A C-104 does not need to be submitted on a plugged well.

I do though need to see (know) what is going on with this well as an application had been submitted for a water disposal well, but according to Will Jones in Santa Fe one had not been approved.

As of today, I do not see any plugging report.

As I understand it, during our conversation today you informed me that this well is not being used as salt water disposal purposes.

As always--- Many thanks,

Bryan G. Arrant
