Gail

This well is out of compliance and when Carmen gets back I will talk to her about correcting the TA date.

They have submitted a Notice of Intent to P and A to BLM, but have not followed up on it.

I also see where they did a TA Mechanical Integrity Test in June 2007 which failed. This gives them 90 days to plug or repair which they have not done.

After talking with you this morning, I will hold off on the NOV and let you handle under the ACOI.

**Subject:** Nordstrand well

Hi Gerry and Carmen – would you please check on a well for me? It's a well operated by Nordstrand Engineering Inc., the West Henshaw Premier Unit #007, 30-015-03884.

It doesn't appear on Nordstrand's inactive well list because it is coded as TA'd. But the TA expiration date says 12/31/9999. That looked weird to me so I checked the well file. I found an old TA that expired back in 2004. Looks like we have been after them ever since to bring the well into compliance. I think it needs to be coded with the correct expiration date, so it shows up again on the inactive well list.

Would you please see if the well is properly coded, and let me know what you find out? Sonny and I are working on an ACOI for Nordstrand. (This won't hold up the order, but I'd like to get the inactive well list cleaned up.)

Thanks- Gail
