13 Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The original drilling plan programmed the top of cement to be located at 3,505' or shallower (500' above the intermediate casing shoe) which became a Condition of Approval for the drilling permit.

Due to lost circulation problems and subsequent cement losses to the formation, the cement bond log indicated the top of cement to be at 3250'. The 255' column of cement inside the intermediate casing exceeds the minimum industry standard of 200' of cement to insure shoe integrity.

Therefore, it is requested that RKI be given a variance for the Condition of Approval and that no remedial cementing be performed at this time.

14 I hereby certify that the foregoing is true and correct.
