13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BEPCO, L.P. respectfully requests the approval of off-lease storage and measurement of production from the Capitan 9 Federal #1. Approval of this request for off-lease storage and measurement at the Golden "8" Battery, located in Sec. 8, T21S, R29E, will allow for more efficient operations at a Consolidated Battery. This will reduce the need for another battery on the Capitan 9 Federal #1 wellpad where the BEU #163 wellbore shares the wellpad and there is limited space available. Using the existing facility will also minimize surface disturbance. Full wellstream production will be transported via flowline to a three-phase heater treater where the oil, water and gas will be separated at this vessel. The oil and water will be metered prior to the oil being stored in its own 500 bbl. oil storage tank; the water will be commingled in a common water tank. Any casinghead gas will be metered via a separate allocation meter, although there is presently no gas production. Please see attached exhibit "A" for well and battery location.
