13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Interim reclamation plan in reference to letter NMNM81953 dated 3-12-08.

Remove 50'X300' caliche east end of pad.

N. side of reserve pit has been remediated and a deep bury pit is on the N.E.

The road comes in on the SW corner which has approx. 4' to 5' build up in sand. Removing more pad from the South or West could become detrimental to the location from natural erosion.

One small pile of dirt will be removed from the N.W. corner of pad.

This location is at the end of a road. If a pulling unit is on location, trucks would not be able to turn around without getting into the sand.

Please contact Scott Pitts for any additional information. 575-748-4196

RE: Interim Reclamation, Conditions of Approval

Interim Reclamation Objectives:

The objective of interim reclamation is to restore vegetative cover and a portion of the landform sufficient to maintain healthy, biologically active topsoil; control erosion; and minimize habitat, visual, and forage loss during the life of the well or facilities.

Onshore Oil and Gas Order No. 1, XII. Abandonment, requires interim reclamation (IR) to be completed within 6 months of well completion. The referenced well was completed December 27, 2007. IR is to be completed by September 27, 2008. If additional time is needed, please contact Bob Ballard at 505-234-2230 prior to due date. Bob should also be notified prior to start and seeding. Seed mixture #2 is to be used as per the APD conditions of approval.

Contact Jim Amos at 505-234-5909 if any questions.

Thanks,

James A. Amos
