☐ Temporarily Abandon

☐ Water Disposal

☐ Water Shut-Off

☐ Well Integrity

☒ Other Propose to

Downhole commingle

13. Describe Proposed or Completed Operation (clearly state all pertinent details, included estimated starting date of any proposed work and approximate duration thereof.

If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Juno 27 Federal Com No. 2 was perfed and flow-tested in the Morrow from 04-03-08 till 05-09-08. On 05-09-08, a RBP was set @ 10300' to cover Morrow perfs and the Atoka was perfed. The Atoka has flowed to sales from 07-18-08 to present. The two zones are now separated by a sliding sleeve which is closed, as the RBP over the Morrow was removed when the Atoka was put to sales.

Cimarex proposes to open the sliding sleeve and downhole commingle the Atoka and Morrow zones. An application has been submitted to the OCD (see attachment) for permission to DHC.

Anticipating DHC order

Once DHC has occurred, a subsequent report sundry notice will be submitted to notify BLM of the resulting percentage split.
