For temporary pits, closed-loop systems, and below-grade tanks, submit to the appropriate NMOCD District Office.
For permanent pits and exceptions submit to the Santa Fe Environmental Bureau office and provide a copy to the appropriate NMOCD District Office.

Pit, Closed-Loop System, Below-Grade Tank, or
Proposed Alternative Method Permit or Closure Plan Application **DEC 09 2008**
OCD-ARTESIA

Type of action: ☐ Permit of a pit, closed-loop system, below-grade tank, or proposed alternative method
☐ Closure of a pit, closed-loop system, below-grade tank, or proposed alternative method
☐ Modification to an existing permit
☒ Closure plan only submitted for an existing permitted or non-permitted pit, closed-loop system, below-grade tank, or proposed alternative method

Instructions: Please submit one application (Form C-144) per individual pit, closed-loop system, below-grade tank or alternative request

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

Administrative Approvals and Exceptions:

Justifications and/or demonstrations of equivalency are required. Please refer to 19.15.17 NMAC for guidance.

Please check a box if one or more of the following is requested, if not leave blank:

- ☐ Administrative approval(s): Requests must be submitted to the appropriate division district or the Santa Fe Environmental Bureau office for consideration of approval.
- ☐ Exception(s): Requests must be submitted to the Santa Fe Environmental Bureau office for consideration of approval.

10.

Siting Criteria (regarding permitting): 19.15.17.10 NMAC

Instructions: The applicant must demonstrate compliance for each siting criteria below in the application. Recommendations of acceptable source material are provided below. Requests regarding changes to certain siting criteria may require administrative approval from the appropriate district office or may be considered an exception which must be submitted to the Santa Fe Environmental Bureau office for consideration of approval. Applicant must attach justification for request. Please refer to 19.15.17.10 NMAC for guidance. Siting criteria does not apply to drying pads or above-grade tanks associated with a closed-loop system.

1.0 INTRODUCTION

On behalf of LCX Energy, South Environmental Services, Inc. has prepared this Closure Plan in compliance with the Oil Conservation Districts (OCD) regulations. The site is located approximately 7 Miles Northwest of the Artesia, New Mexico. Topographic and Aerial Maps have been provided as Figures 1 & 2.

2.0 PROTOCOLS AND PROCEDURES

As illustrated in the attached Figures, the Excavation and Backfill procedures shall follow all applicable protocols and rules outlined in 19.15.17.10 NMAC. All liquids will be removed prior to excavation process and the in place soil will be mixed at a 3 to 1 ratio. South will take special care to ensure all impacted soils are included in excavation and disposal. As outlined an approved state disposal facility will be utilized for waste disposal. Confirmation Sampling shall take place to ensure no impacted soil has been left in place. All backfill material will be appropriate soil, clean and compacted. Re-Vegetation and Site Reclamation procedures will be followed according to NMOCD Rules as outlined below.

3.0 CONFIRMATION SAMPLING PLAN

As illustrated in the attached figures, confirmation sampling shall take place after impacted material has been disposed of on-site. The confirmation samples shall be taken for each sidewall (North, South, East and West) as well as a Bottom Hole. If confirmation sample results do not meet regulatory requirements, a supplemental plan will be established to address the results.

4.0 DISPOSAL FACILITY NAME AND PERMIT NUMBER

Controlled Recovery, Inc Disposal, Permit#: NM R-9166

5.0 SOIL BACKFILL AND COVER DESIGN AND SPECIFICATIONS

Please see the attached figures for design and specifications. As illustrated, the soil cover shall be an adequate backfill material, compacted and non-waste containing, from top of cap (>4' below ground surface) to >1' below ground surface and topsoil to surface grade.

6.0 RE-VEGETATION PLAN

The attached Figure 7, & 8 show the proposed re-vegetation plan. As illustrated, the re-

vegetation shall take place with a minimum of 70% native perennial vegetative cover consisting of at least 3 native plant species, including at least one grass and no noxious weeds. Cover shall be maintained through 2 successive growing seasons.

7.0 SITE RECLAMATION PLAN

Site reclamation will be accomplished through several steps. As illustrated in the attached figures, the original surface grade will be established with both the original reserve pits and the burial trench and re-vegetation will take place as described above. Additionally, site photo documentation will be submitted upon closure request to show that proper surface measures have been taken to ensure the site is brought back, as much as possible, to its condition before surface activity took place.
