Re: Notification of Pit Rule Oversite

Dear Mr. Bratcher:

Please be advised Rubicon Oil & Gas, LLC (Rubicon) herewith submits the new Form C-144 CLEZ (Permit Application) for the following wells in fulfillment of the current New Mexico Oil Conservation Division (NMOCD) regulatory mandates for pits and/or closed loop systems: (1) Big Johnson No. 1 (API No.: 30-015-36347), (2) Momo 33 No. 1 (30-015-36322), (3) Dark Canyon 19 Federal No. 1 (30-015-35921)

Rubicon had submitted the C-144 under Pit Rule 50 for the purpose of deep burying pits since they were considered for drilling in early 2008 prior to implementation of the new Rule. It was, as well, the custom to submit the Pit Rule 50 C-144's with the APD Application. Thus, the next time an Operator had to address this document was at actual pit closure. However in the case of these wells, although permitted under the old rule, they were not spudded until after 15 June 2008 for various, significant considerations.

Subsequently, Rubicon in attempt to comply with the new Rule changed its drilling format from utilization of a drilling pit system to that of a closed loop system. Some of these location revisions required additional time and money to restructure the system for closed loop processing. During this time of evolution, NMOCD mandates were constantly changing making infield implementations and document development extremely confusing, at a minimum. Thus within the confusion of this dynamic regulatory environment, Rubicon inadvertently failed to resubmit its Form C-144's for all wells now spudding after 15 June 2008, even though they had previously been in compliance.

Therefore, Rubicon herewith petitions the NMOCD for leniency regarding this seemingly small infraction for the following reasons: (1) closed loop was immediately employed; (2) the locations were compliant under the old Rule; (3) corrections are being immediately addressed and (4) no harm was done to the environment nor any regulatory parameter eschewed.

We thank you for your consideration and appreciate your kindness in recognizing our efforts to remain compliant, as has been our track record. Please call should you have questions (432-684-8006).

Sincerely,

Hall Lee Operations Manager/Agent

Subject: Rubicon C-144 CLEZ Permit/Closure

Hi Wayne and Daniel!

I hope your Holiday time was relaxing!

On behalf of Rubicon, my sincere thanks to you both for your time and assistance regarding the Rubicon Form C-144 dispositions wherein the Operator had filed their APD's pursuant to Pit Rule 50, which was in effect at that time but was not actually able to drill their wells until after the new Pit Rule had gone into effect. However, all locations implemented a closed loop system. Consequently, a new Form C-144 CLEZ Permit application should have been filed for the following locations but was inadvertently overlooked in the maze of the changes which ensued at that time in history:

1. Momo 33 No. 1

(API No.: 30-015-36322)

2. Dark Canyon 19 Federal No. 1

(API No.: 30-015-35921)

3. Big Johnson No. 1

(API No.: 30-015-36347)

Rubicon having discovered the oversight, now desires to bring these records into compliance with the new pit rule by simultaneously submitting the replacement (C-144 CLEZ Permit) for the Pit Rule 50 C-144 Permit (previously approved) along with the C-144 CLEZ Closure. All locations have completed drilling activities.

Rubicon, therefore, is requesting approval of the respective above cited document corrections and an exemption from the issuance of an NOV due to the circumstances upon which the oversight occurred. As we also discussed, I desire to deliver these documents to the Artesia Office so that I can obtain my stamped copies directly and would request, therefore your concurrence via return email.

Again thank you very much for your assistance. It is appreciated!

Cheryl
