The pumper left a valve shut on the water pump.

Describe Area Affected and Cleanup Action Taken.\*

The impacted area was the bermed area of the tank battery near the fiber glass tank. The impacted soil were excavated and hauled to Lea land Inc. A total of 10 cu. yds of impacted soil was hauled to the land fill. Soil samples were taken for analytical on 8/12/2008 from the north side wall in the excavated area. Soil samples were submitted to a second party lab & analysis ran for Chlorides using EPA Method 4500 CL B. Analytical results dated 8/12/2008 reported the Chlorides to be 544 ppm at a depth of 6" BGS and 832 ppm at a depth of 3' BGS. The Chlorides levels as reported by Cardinal Laboratories are reasonable for the area. No further remediation actions are required. Yates Petroleum Corporation is submitting the final C-141 form for the release that occurred on 5/31/2008 and requesting closure for the release.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
