Re: C-108 for 30-015-23977
Unit K, Sec. 1, T24S-R31E
Eddy Co., NM

Dear Mr. Jones:

Following our communication regarding AOR well(s) with inadequate production casing cement in a proposed disposal interval, it is prudent that we withdraw our SWD application for the subject well.

The southeast diagonal offset to the proposed SWD has a producing well wherein the 5-1/2" casing TOC is at 6114' below surface. Our applied for interval of injection is perforations from 4538' to 5950'.

At least I will know better next time! Thanks for your assistance.

Respectfully yours,

Kay Havenor
